RE: Field Inspection, Peak Minerals, Incorporated, AUMCO
Claim #1, S/039/001, Sanpete County, Utah

On June 15, 1989, Wayne Hedberg inspected the above mentioned mine site with the purpose of determining the extent of mine site development. The operator had submitted a letter, received May 12, 1989, which described the amount of mine development that had been performed by Peak Minerals to date.

A series of photographs had been submitted with the letter. These were used as a basis for comparison with the actual disturbances. It was apparent that there has been very little, if any, additional activity that has taken place on the site since the photographs were taken. There was no mining related equipment on the mine property and no environmental problems were noted during the inspection. Total surface disturbance was visually estimated at 2 - 2 1/2 acres. Some of this disturbance was related to previous mining activities by operators prior to Peak Minerals acquisition of the mining claims.
